

Meeting Reports

Date: 11/10/2022

Not In Attendance: N/A

What's Been Done since the Previous Meeting:

We have all come up with ideas for the requirements for the project and what pages the system should include.

What's Being Done:

We are all going to get some user stories done to agree on our MVP requirements. And once this is done, we will agree on what frameworks and methodologies to use. We are also going to do some research on similar systems that already exist, to get some more ideas of features that can be implemented.

Date: 14/10/2022

Not In Attendance: N/A

What's Been Done since the Previous Meeting:

We have all researched into what frameworks we would want to use and are between React and Vue. On top of that we have all created some user stories for our system. We have also looked into similar systems (Fiverr and Upwork). In addition, we have researched project management tools that we could use (Taiga, Github Repository).

What's Being Done:

Make a final decision on what framework to use. We also need to get our project management tools set up and running so we can use it from now on. Also do some additional planning, such as UI design, setting up sprints, additional research into our project.

Date: 14/10/2022

Not In Attendance: N/A

What's Been Done since the Previous Meeting:

Nothing, this meeting directly follows on from the last one, but it was with our supervisor in attendance too to give us some extra pointers/advice.

What's Being Done:

Everything from the previous meeting plus: starting to design the database, with a basic diagram. Deciding in on the framework, with everyone getting it set up on the computer and doing some basic code to learn the framework. Setting up git (version control).

Date: 18/10/2022

Not In Attendance: N/A

What's Been Done since the Previous Meeting:

Git repositories (version control) have been set up with everyone gaining access to it. Taiga project manager has also been created. Some more basic UI design has been done. Members of the group (Alex and Rawan) starting to learn react with it set up on their computers. Database design by Lukas

What's Being Done:

Set up the sprints using Taiga. Further learning of react native, even trying to code a simple login page for our app (obviously this will not be final). Further system research and a bit of further UI design so we can start to finalise our idea.

Date: 21/10/2022

Not In Attendance: N/A

What's Been Done since the Previous Meeting:

Kept working on the Database and drew a UML diagram for the database.

What's Being Done:

After feedback on the database, some changes need to be made, and we are going to look into Firebase for the chat system. Alex is going to make a signup page, Rawan will make the login page, and David will make the homepage. Lukas will keep trying to implement the database.

Date: 25/10/2022

Not In Attendance: N/A

What's Been Done since the Previous Meeting:

Lukas has made changes to the database to fix previous terms. Alex has finished a signup page; David is doing the homepage. Still need to discuss styling for all our pages.

What's Being Done:

Lukas is further looking into implementing firebase for the chat system. All pages will be styled more and added to the git repository.

Date: 28/10/2022

Not In Attendance: Lukas

What's Been Done since the Previous Meeting:

Lukas had created a simple chat system using Firebase. Alex had made a signup page and created the navigation stack to go between pages. Rawan had made a login page and David had made a simple home page. The database isn't set up or connected but the functionality works with hard coded data.

What's Being Done:

Lukas will make some changes to the database. Everyone will add some touch ups to the pages to add more information that's needed. Our supervisor also advised us to create a plan for what we should do for the upcoming project week to make the most use of our time.

Date: 04/11/2022

Not in Attendance: Rawan

What's Been Done since the Previous Meeting:

We created a plan for project week.

What's Being Done:

Alex will fully integrate the MySQL database with the system and make sure the login and signup pages are fully functional. Lukas is going to create a better chat system for the app. Rawan would create the 'Post Job' functionality and page and David would do the profile page.

Date: 11/11/2022

Not In Attendance: David

What's Been done since the Previous Meeting:

Lukas has created a fully functional chat system implementing a Realtime firebase database system. Alex has integrated the MySQL database with the system, with a working signup and login feature. Rawan has started the 'Post Job' page.

What's Being Done:

Lukas is going to integrate the chat system with the whole app as the MySQL database is functional. Alex is going to do the profile page and touch up the signup page as well. Rawan is going to finish the 'Post Job' page.

Date: 15/11/2022

Not In Attendance: N/A

What's Been Done since the Previous Meeting:

Not much has been done as we were all busy over the weekend with other assignments and commitments.

What's Being Done:

Lukas will still integrate the chat system with the rest of the app. David is now going to do the profile page instead of Alex. Alex is going to create a home bar for the app and still touch up the signup page. Rawan is still going to finish the 'Post Job' page.

Date: 18/11/2022

Not in Attendance: N/A

What's Been Done since the Previous Meeting:

Alex has created a navbar at the bottom on the screen. Rawan has finished most of the post job page, but it doesn't connect with the database. Lukas has created a session variable for the user ID and navigation for the chat page.

What's Being Done:

David is going to finish the whole profile page, linking it with the database. Rawan will connect the post job page to the database. Lukas is going to fully finish the chat system and Alex will try to create an online database to make it easier for the group and make some improvements to the sign-up page.

Date: 25/11/2022

Not In Attendance: N/A

What's Been Done since the Previous Meeting:

Alex has created put the database onto a university server so that the whole group has access to the same database and has also made amendments to the signup page. Lukas has fully integrated the chat system with the app. David has started the profile page. Rawan has added more changes to the post screen.

What's Being Done:

Lukas and Alex are going to start working on how jobs will be viewed by a user (on the homepage and using search). Rawan will fully finish the post job page and David will also fully finish the profile page.

Date: 29/11/2022

Not In Attendance: Rawan, David

What's Been Done since the Previous Meeting:

Lukas has made it automatically redirect to the chat page, where previously it would go to an extra login page first. Alex has done research into how to view posted jobs.

What's Being Done:

Lukas And Alex is both going to be working on viewing jobs on our app.

Date: 02/12/2022

Not In Attendance: N/A

What's Been Done Since the Previous Meeting:

Lukas has created a page that gets the job information from the database and displays it on a page. Alex has made the small thumbnails display information for the job and make it redirect to the job page when clicked. David has created a edit profile page.

What's Being Done:

Lukas is going to create the UI for the job page and start on the create application page. Alex is going to make the thumbnails recyclable so it can be reused to display multiple jobs. He is also going to look into storing images. David is going completely finish the profile page and Rawan is going to completely finish the post job page.

Date: 06/12/2022

Not In Attendance: Rawan

What's Been Done Since the Previous Meeting:

David has continued to work on the profile page to get it fully functional and finished. Alex and Lukas haven't had much of a chance to do work on the project due to other commitments.

What's Being Done:

Same as group meeting from 02/12/2022.

Date: 09/12/2022

Not In Attendance: N/A

What's Been Done Since the Previous Meeting:

Lukas has finished the create application page and done some slight improvements to the UI in the job page. Alex has made the job thumbnails recyclable. Rawan has finished the post job page and David has made the profile page display the correct information from the database.

What's Being Done:

Lukas is going to create a specialties page on signup so a user can select if they have any. Alex is going to make the thumbnails display photos. Rawan is going to start the UI design on all the pages and David is going make the edit profile page functional and start the page for when viewing other people's profiles.

Date: 26/01/2023

Not In Attendance: David, Rawan

What's Been Done Since the Previous Meeting:

Lukas has created a selecting specialties page upon signup where the user can select multiple specialties if needed. He has also created a page where users can view the jobs they have posted,

and jobs they have applied for. In addition, he has created another page with all the applications for the logged in user's job, where they can accept or reject it. Alex has created a section where users can upload images for their jobs, however it doesn't upload right now.

What's Being Done:

Lukas is going to keep working on the flow of viewing/interacting with jobs and applications, and Alex is going to fix the issues with image uploading, and work on the search functionality.

Date: 02/02/2023

Not In Attendance: N/A

What's Been Done Since the Previous Meeting:

Lukas has finished the functionality of accepting/rejecting jobs. Alex has finished the posting a photo functionality for the jobs. Rawan has created a UI design for the login page and drafted the login page. David has started the viewing other people's profiles page.

What's Being Done:

Lukas will keep working on the flow of viewing/interacting with jobs and applications. Alex will start with the search functionality. David will keep working on all the profiles pages and Rawan will keep going with UI design and the poster.

Date: 03/02/2023

Not In Attendance: N/A

What's Been Done Since the Previous Meeting:

Not much more has been done since as it's more of a catch-up meeting. Lukas has made edits to some job/application pages, and Alex has made some slight edits.

What's Being Done:

We have all caught up and are all on the same page. We will continue doing what we discussed we would do yesterday.

Date: 07/02/2023

Not In Attendance: N/A

What's Been Done Since the Previous Meeting:

Lukas has finished the flow of viewing/interacting with jobs and applications. Alex has fixed several bugs in the system. David has finished the profile page and Rawan has done UK design for the profile and login page.

What's Being Done:

Lukas is going to fully integrate the chat system with the rest of the program. Alex is going to work on the search functionality, David is going to start on reviews, and Rawan will keep going with the UI design and posted.

Date: 07/02/2023

Not In Attendance: N/A

What's Been Done Since the Previous Meeting:

Lukas has finished the flow of viewing/interacting with jobs and applications. Alex has fixed several bugs in the system. David has finished the profile page and Rawan has done UK design for the profile and login page.

What's Being Done:

Lukas is going to fully integrate the chat system with the rest of the program. Alex is going to work on the search functionality, David is going to start on reviews, and Rawan will keep going with the UI design and posted.

Date: 16/02/2023

Not In Attendance: N/A

What's Been Done Since the Previous Meeting:

Rawan finished the poster and UI design for the homepage. Lukas has managed to have the chatroom open once the job has been accepted, and a task bar at the top with the ability to view the user's profile, and the host user can mark the job as complete. Alex has created a search functionality, that looks for keywords in the database. David has created a new review page and wrote the abstract.

What's Being Done:

Lukas will keep working with the chat page and look into adding location services to look for nearby jobs. Alex will keep working with the search algorithm adding a filter to it as well. David will keep working on the reviews and Rawan will continue on UI design for the project.

Date: 23/02/2023

Not In Attendance: N/A

What's Been Done Since the Previous Meeting:

Lukas has been working on the chats screen making it work smoother and has found some API's to use for the location services. Alex has been working on search functionality and fixing bugs in the code. David has almost finished the reviews functionality and Rawan is still doing the UI for the system.

What's Being Done:

Everyone will keep working on the same things from the last meeting and finish all final functionalities.

Date: 02/03/2023

Not In Attendance: N/A

What's Been Done Since the Previous Meeting:

Everyone has been doing final touches to the project to have it ready for display for the project fair. David has finished all the reviews/profile mechanics, Lukas has finished some last chat functionalities, Rawan has finished most of the UI design and Alex has almost finished the search filter functionality. Lukas has also looked into adding a nearby jobs location functionality.

What's Being Done:

There are some last-minute additions that need to be made. Lukas is going to add the nearby jobs feature on the homepage. David will fix some bugs. Alex will finish fixing the bugs with the filter functionality and Rawan will make sure all the UI is done.

Date: 09/03/2023

Not In Attendance: N/A

What's Been Done Since the Previous Meeting:

The code has been complete, and the app is finished. The group is now looking towards the documentation and testing.

What's Being Done:

Lukas is going to start on automated testing. There are still some bugs, and Alex is looking towards fixing them. Rawan is going to plan the group report structure and start on user testing and David will investigate what is needed for the corpus.

Date: 16/03/2023

Not In Attendance: N/A

What's Been Done Since the Previous Meeting:

Lukas has created some tests for main pages in the system. Alex has done some writing on the report and organising the user stories. David has created the structure for the corpus and Rawan has worked on user acceptance. Alex and Lukas have done some commenting on the code as well.

What's Being Done:

All of us will comment our code over time. Lukas is going to write a few more tests for the code and create a new EAR diagram for the database, and some more diagrams, i.e., for the firebase and system flow. Alex is going to keep working on the report, Rawan will finish the user acceptance and David will start filling out the corpus.

Date: 23/03/2023

Not In Attendance: N/A

What's Been Done Since the Previous Meeting:

Everyone has mainly been writing the report and buffing up the corpus. Lukas has finished the Database folder, most of the Research and Planning folder, finished the documents and test scripts for both front end and back-end testing, and created use case diagrams for the system. Rawan has finished the User Acceptance testing document and is almost done with the user manual. David has worked on the report and video, and created a cover page and Alex has been working and filling out the report. We have gone back and looked at the comments in our code as well.

What's Being Done:

Everyone is going to keep working on the corpus and report and make sure everything is good for the submission next week. David is also going to complete the video demonstration.

Date: 29/03/2023

Not In Attendance: N/A

What's Been Done Since the Previous Meeting:

Everyone has been working on the corpus and report. David has made the video.

What's Being Done:

Finalising the report and submitting.
